

# **COPYRIGHT LICENSE**

Clandestin Ecosystem (QRM)

## **1. Ownership of Copyright**

All official documents, whitepapers, token distribution records, technical specifications, and ecosystem rules (“Works”) produced within the Clandestin ecosystem are protected by international copyright law and related treaties.

Ownership of these Works remains with the Clandestin ecosystem, represented collectively by its creators and contributors. No transfer of copyright is implied by the publication of these Works.

## **2. License Grant to Users**

- Users are granted a non-exclusive, worldwide, royalty-free license to read, share, and redistribute the Works for informational and educational purposes.
- Users may create derivative works (such as translations, summaries, or analyses), provided such works are clearly marked as “unofficial” or “derivative” and must include proper attribution to the Clandestin ecosystem.
- The license permits digital and print reproduction of the Works, so long as it is non-commercial in nature.

## **3. Restrictions on Use**

- The Works may not be sold, sublicensed, or otherwise commercialized without explicit authorization.
- Unauthorized modification, misrepresentation, or removal of attribution is strictly prohibited.
- The Works may not be used in connection with fraudulent, deceptive, or competing projects that seek to undermine or confuse the Clandestin ecosystem.
- The Works may not be incorporated into proprietary databases, closed systems, or locked-down content repositories without maintaining open attribution.

## **4. Enforcement & Remedies**

- Any misuse or infringement of the Works constitutes a violation of copyright and may result in enforcement actions, including but not limited to takedown requests, community-based exclusion, or other remedies as permitted under applicable law.
- The Clandestin ecosystem reserves the right to revoke the license of any party found misusing or misrepresenting the Works.
- The Integrity Clause applies: altering official Works without declaring them as “unofficial” or “derivative” shall be treated as falsification.

## **5. Limitation of Liability**

The Works are provided “as is” without warranties of any kind.

- The ecosystem makes no guarantees about accuracy, completeness, or fitness for a particular purpose.
- The creators, analysts, and contributors disclaim liability for damages, losses, or claims arising from reliance on the Works.
- Users assume full responsibility for verifying the reliability of the Works before application.

## **6. Governing Law & Jurisdiction**

This License is intended to apply globally, across all jurisdictions, without recognition of any single national law.

Any disputes regarding the use of the Works shall be resolved through decentralized arbitration, peer consensus, or applicable international copyright norms, rather than traditional courts, whenever possible.
