3. Clandestin Privacy Policy

(Politica De Confidențialitate Clandestin – English Version)

PRIVACY POLICY – CLANDESTIN ECOSYSTEM

(version 1.0 – July 21, 2025)

Identity: Clandestin is the ecosystem; QRM is its symbolic token.

1. Zero-Data Principle

The Clandestin ecosystem is designed to operate without collecting personal data.

All critical interactions (signal validation, QRM transactions) take place on-chain on Solana, and wallet addresses are pseudonymous.

2. Information We DO NOT Collect

Name, address, e-mail, persistent IP, device ID.

Biometric data, GPS location, profiling cookies.

Browsing history or purchase behavior.

3. Minimal Technical Logs

Our servers (Railway/Vercel) may store anonymous error logs (timestamp + status code) for debugging, kept for less than 30 days.

IPFS gateways may register transient IPs according to their policies; Clandestin does not correlate or analyze them.

4. Analytics Without Cookies

We use Plausible (self-hosted) in "no-cookies" mode only for aggregate metrics (e.g., unique visitors/day).

We do not set tracking cookies.

5. Connected Wallet

When you connect a Solana wallet:

The dApp signs a local nonce; we do not save public keys on the server.

Successful validations are stored in browser localStorage, not on the server.

6. Data Sharing

We do not sell, rent, or share data with third parties.

The only data transmission is to the blockchain via Solana RPC, which is inherently public.

7. User Rights (GDPR)

Access / Rectification / Deletion: we do not hold personal data, so requests are not applicable.

Portability: on-chain transactions are public and can be exported by anyone.

8. Security

Source code is periodically audited; hosting uses TLS 1.3 infrastructure.

Backups contain no personal data; only code and static IPFS files.

9. Children and Minors

The project is not intended for persons under 18 years old. If you are a minor, you are asked not to use the dApp.

10. Policy Changes

Any update will be posted with a clear date on this page.

Continuing to use the services = acceptance of changes.
