2. Clandestin Fairness Law

(Legea Echității Clandestin – English Version)

CLANDESTIN FAIRNESS LAW

(updated version – July 21, 2025)

Key maxim:

"No reward without concrete action."

0. Clandestin Ecosystem Identity

Clandestin is the ecosystem; QRM is its symbolic token.

The project is highly decentralized: anyone can participate without special hardware and without massive energy consumption.

Everyone can "mine" (validate) signals and access the network with a simple Solana wallet and Morse logic.

Identitarian maxim: "Token or cult? You decide."

1. The Principle of Reward Through Reaction

Each QRM token issued corresponds to a verifiable action: correct decoding + unique validation of the signal.

Tokens are not gifts and cannot be obtained through mere holding or staking.

2. Divergent Contributions, Equal Merit

Miners bring daily validations (signals → rewards).

Massive burning (≥ 10,000,000 QRM) allows obtaining the rare NFTs:

MARTOR / INITIAT / CONSTRUCTOR / DIVERGENT.

Annual progressive NFTs are assigned only to participants who, after 12 months, have validated all signals of that year or have met the burning threshold above.

3. Reaction > Possession

CLANDESTIN rewards promptness and intelligence, not capital.

No arbitrary airdrops, no seniority privileges, no whitelist.

4. Impersonal & Incorruptible

One Morse signal = one unique validation.

Duplicates or fraud attempts are rejected logically.

5. Balance & Progress

Level 1 is accessible; levels 2-4 gradually increase in difficulty and value.

Organized intelligence is encouraged; brute exploitation is inefficient.

6. Official QRM Distribution (revised)

Allocation	Percent	QRM	Destination
Network	80%	147,573,952,589.6764	Rewards, LP, Security Wallet (4 years)
Creator	12%	22,136,092,888.4515	Visionary engine & signal curator
Ecosystem Security	5%	9,223,372,036.8548	Rapid reaction fund (attack, panic-sell)

AI Development 3%   5,534,023,222.1129   Exclusive AI budget for network evolution

Total Supply   100%   184,467,440,737.09552 Fixed, mint authority revoked

7. 4-Year Transparency

The annual plan for signals and rewards is public (see "QRM Distribution Over 4 Years").

All security & AI funds are on dedicated addresses, tracked on-chain.

8. Integrated Anti-Fraud

Each signal has a numeric identifier (-001 … -n).

GeoPing system + logic CAPTCHA + "one wallet / signal / salt" limit prevent exploits.

The creator cannot self-validate signals.

9. Compliance & Privacy

No personal data collected (GDPR/CCPA compliant).

Participation is anonymous; only public Solana addresses are visible.

10. Human + AI Collaboration

The CLANDESTIN network is the result of a symbiosis: human intuition & synthetic logic.

AI acts as guardian, auditor, and rapid-action pool manager.

Conclusion

The Fairness Law of CLANDESTIN is the law of reaction. Whoever sees the signal, understands it, and acts—deserves it. The rest wait for the next signal.
